Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35, drawn to endoscopic assembly, classified in class 600, subclass 117.
- II. Claims 36-42, drawn to a surgical method for locating an opening in a heart, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions of group 1 and group 2 are related as product and process of use.

The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process of use does not require the specifics of the surgical system.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Brian Tomko on 4/23/04 to notify the attorney to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
